Hi Naresh,

Thank you for providing guidance and support for the CCSP Exam, I couldn't have done this without your help. Your study material was to the point and precise and covered all aspects of the course. Also, your follow ups to track my progress made sure I don't lose sight of the target.

I cleared my CISSP back in 2014 and in the last few years I was working on various cloud security technologies which really helped me alot for this exam.I appeared for CCSP exam two months after finishing online classes with you during which I was able to spend almost 2 hours everyday studying for CCSP.

Here is the list of study material I referred : -

1) Study Notes provided by Naresh
2)  The Official  Guide to CCSP CBK
3)  Official Practice Tests
4) CCSP Exam Guide ( Carter) All in One
5) You tube Videos on Concepts - SSO, Federation, Cryptography, OWASP, DLP, etc

The unusual thing about it is that you can neither go back to answer the question while testing nor review your answers at the end, you are forced to submit. I think anyone appearing in the exam should take a note of it.

I would recommend your training to anyone who is planning to take the CCSP Exam.

Thank you,
