Dear Sir,

I am happy to inform you that I passed the CCSP exam on the 21st of February 2021. This wouldn't have been possible without your guidance.

My study plan for the exam:

I studied for almost 1 year and during the course, I referred to resources append below. CCSP is not easy and we need to understand the concept very well. You ensured that I understood these concepts, I always prepare a note of key points to remember, and that also helpful during the revision.

1) I started my course by attending an excellent training conducted by Mr. Naresh Gupta.
2) CCSP ISC2 Official book
3) ISC2 practices test
4) CSA Guidance
5) Studied CSA CCM
6) Studied ENISA Cloud Computing Risk Assessment
7) Studied OWASP top 10
8) Appeared CCSKv4 Exam conducted by CSA (strongly recommend)

Regards
Manish K Tiwari
