Hi Naresh,

I passed the CCSP exam on 3rd December 2020. The exam was more difficult than I expected. My journey to CCSP certification was somewhat unusual. I took over 10 months to complete this cycle of learning. I would not recommend this timeline or approach for everyone, but a relaxed pace ultimately worked well for me. It allowed me to better absorb and apply the technologies set forth in the CCSP guidelines.

Just reading books does not help to pass CCSP exam as clear and deep understanding of the concepts are the key here. For this your support and training helped me a lot.

References I used :

- 1) CCSP CBK by Goron
- 2) CCSP official study guide by Daniel Carter
- 3) CCSP Practice questions from Sybex
- 4) CCSP Training material by Mr Naresh Gupta

Once again thanks to you for your guidance.
